Pro Linea Door Handle

Our exclusive range of Pro-Linea door handles makes a bold style statement, enhanced by an attractive range of finishes.

Available in both lever and pad designs, our Pro-Linea handles have been ergonomically designed for optimum comfort and ease of operation when in use.

Their soft lines perfectly complement the chamfered appearance of modern door styles.

For use with un-sprung door locks or to avoid the problem of "sagging" handles, a spring module has been built-into the Pro-Linea handle back plate, ensuring that the handle always returns to 90° after each use.

TECHNICAL SPECIFICATION

Type: All aluminium doors

Locking Options: Suitable for un-sprung locking mechanisms

Finishes: Contemporary Chrome, Traditional Black, Elegant Gold and Minimalist White

The Showroom, 257 Guildford Road, Effingham, Surrey. KT24 6ER

Genesis Locking Door Handle

Introducing the innovative Genesis Locking Handle and gear box – an attractive and practical option, for use on sliding and folding doors (bi-fold doors).

Designed to drive a bi-directional lock on the folds without the risk of key-scratching profiles, Genesis is an effective and functional feature, styled to complement our doors rather than detract from them.

With no visible screws in the closed or open positions, the Genesis Locking Handle and its accompanying bi-parting gearbox, rods and end pieces are easy to fit.

Boasting a side-entry locking mechanism to avoid damage to the door profiles, usually caused by protruding keys, the Genesis Locking Handle enjoys a sturdy yet smooth finished appearance.

TECHNICAL SPECIFICATION

Type: Timber sliding and bi-fold doors

Locking Options: Cylinder locking, non-locking

Finishes: Satin Chrome, Bright Chrome, Gold, Stainless Steel, White, Black
